

1. What I have done

- Updated the vitivr query to use the part-of function.
- Added support for streaming videos.
- Improved the menu by adding settings for movement speed and turn speed, as well as color feedback when changing the endpoint.
- Created scripts to unify media formats by converting GLTF files to GLB, pictures to JPG, and videos to OGV.
- Added pillars and rotatable orbs for placing 3D objects.

2. Where I need support

- Access to an Apple Vision Pro for testing.
- Access to videos and 3D assets?

3. What I am planning to do for the next meeting

☐ Improve the VR museum environment

☐ Clean up code

☐ Test Godot on the Apple Vision Pro

☐ Prepare for the next weekly meeting
