

1. What I have done

- Reworked the vitivr response handling to use typed JSON deserialization.
- Added time-aware video search results so that playback starts at the segment returned by vitivr.
- Improved museum interaction and presentation.
- Drafted the introduction, related work, technical background, concept and implementation chapters, and prepared the structures for the evaluation and conclusion chapters.
- Added technical figures for the related work, retrieval background, conceptual architecture and implemented architecture.

2. Where I need support

- Feedback on the current thesis draft.
- Email addresses of the potential user evaluation participants.

3. What I am planning to do for the next meeting

☐ (p1) Refine the current thesis chapters

☐ (p1) Prepare the user evaluation

☐ (p2) Write the evaluation and conclusion chapters
